

## LUXURY SET IN STONE

Elite Stone was founded in 2000. Since 2013, its headquarters have been housed in Verona, in two buildings: Slab Division for stacking stone slabs, and ES Atelier which opened this year, for an array of interior decorating ideas using marble, onyx, semi-precious stone and back lit panels in room settings.

Elite Stone latest innovation is the E-Light system: thin sheets of marble and onyx layered on LED lights embedded in transparent glass. E-Light adds a theatrical effect to kitchens, cabinet doors, room dividers and front doors, an idea which has taken ten years of research to perfect.

The new London showroom will be on one floor, in an area of 200 square metres, with a 'back to nature' entrance, a living room with sliding doors, a back lit jaguar panel and the 'one plate kitchen' in back lit onyx where appliances slide away.

## NEW GROWTH

This delightful, lifelike white cherry blossom arrangement by New Growth Designs is a great accent for any season and any room. The dark, natural looking branches are filled with dozens of realistic flowers and small green leaves perfectly capturing the cherry blossoms at their peak. Each stem is permanently set in clear acrylic solution that looks exactly like water and this delightful bouquet is arranged by hand in a mouth-blown glass column vase.

## OASIS

This stunning living room by Oasis exudes luxury with its clean lines and metallic accents. The Dahlia sofas shown with contrast piping add comfort to the room, whereas the Castor and Pollux low tables, available in rich finishes and materials, create a dramatic contrast. The Magritte Library in a warm bronze finish and the bronze Moon collection lamps complete the setting by adding warmth to the welcoming interior. [www.oasisgroup.it](http://www.oasisgroup.it)
